

Act now before lighting rebates go dark

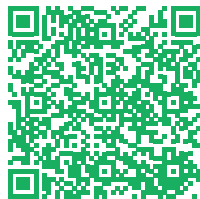

Don't delay! Schedule your LED lighting projects before rebates end.

Utility programs across the state will soon be phasing out lighting rebates, which means now is the time to upgrade your facility's lighting. If you wait too long, you'll miss out on significant rebates from NYSEG and RG&E — along with monthly energy savings for your business. Take advantage of these rebates before they're gone for good!

What rebates are available?

Our Commercial & Industrial and Small Business programs provide rebates to help make energy-efficient facility or equipment upgrades more affordable. Commercial & Industrial customers can receive rebates of up to 50% of the eligible project costs, and small businesses can receive rebates of up to 60% of the eligible project costs. To learn more about the specific lighting rebates that are available, scan this QR code to view the Lighting Catalog:

Which businesses are eligible for which program?

Non-residential customers with usage under 110 kWh are eligible for the Small Business program, and customers whose energy use is over 110 kWh are eligible for the Commercial & Industrial program. To help determine your eligibility, please contact us!

Why make lighting upgrades?

In addition to saving on the upfront investment with program rebates, these improvements can lower your business' annual energy expenses, reduce maintenance and replacement costs, improve safety, increase reliability, and enhance aesthetics.

How can my business get started?

You can contact a contractor of your choice. If you don't have a contractor, you can find one near you by visiting nysegrgeta.com/contractor or by contacting us today.

Don't let these lighting rebates pass you by. Start saving today!
